Re.: Testimonial for outstanding service

Dear Jakub

Deep down inside I am a bit of a computer Geek. I love my technology, however it is fair to say that I have limited understanding of how it all works.

5-6 hours of my day are spent on the computer and so when my old laptop started to regularly crash, I asked for your help.

Your suggestion to ditch my laptop and replace it with a desktop and a netbook was inspired.

You advised what equipment to order, provided a competitive quote, built the system and installed it on site.

Now I have a super-fast desktop and a tiny little netbook, and everything works perfectly... actually, better than perfectly, as thanks to Exchange and Dropbox all my files and emails are automatically shared between my desktop, netbook and iPhone.

And then when an errant software update caused problems, you were here within hours to sort it out.

I love my IT now. It works, and it works perfectly!

Kind regards

ASHLEY WINSTON
Director
